- 5 Flow Application Tips

FOR EVERY START KIT PURCHASED
YOU WILL GET 1PC COMPOSITE GUN
(WORTH RM100) FOR FREE.

DIRECT SYSTEM PEDIATRIC CROWN

Edelweiss PEDIATRIC CROWNS are made of a laser sintered barium glass, which makes them both highly antibacterial and plaque resistant. These crowns are biocompatible they have the same abrasion as natural teeth, hence the edelweiss PEDIATRIC CROWN does not damage the antagonist tooth. The mesial and distal margins of the edelweiss PEDIATRIC CROWN follow the natural gingival line of the milk teeth.

EASY AND SAFE TREATMENT FOR A HEALTHY SMILE FOR CHILDREN

EDELWEISS VENEER & OCCLUSIONVD

The laser-treated process combines the best of two worlds: a homogenous, inorganic and high-gloss surface fused together with a thermally-tempered and dynamic composite core produce optimal integration between function and esthetics. The different is in its similarity to nature.

ALGINATES

Zhermack
Dental

HYDROGUM 5

RM42.00/BAG OF 453G

Hydrogum 5 is an extra-fast setting alginate with high dimensional stability.

Advantages

- Long dimensional stability of impressions (5 days of dimensional stability)
- Easy mixing
- Homogeneous mass, smooth, compact surfaces

BUY 12 FREE 1
(SAVE RM42)

ORTHOPRINT

RM42.00/BAG OF 500G

Orthoprint is an extra-fast alginate with a vanilla scent that is recommended for orthodontic use.

Advantages

- Very precise and very practical
- Emetic reflex reduction
- High elasticity
- Vanilla flavor
- Fast water absorption

BUY 12 @ RM492 **BUY 36 FREE 2**
(SAVE RM12) (SAVE RM84)

TROPICALGIN

RM38.00/BAG OF 453G

Tropicalgin is a fast chromatic alginate.

Advantages

- Easy mixing
- Homogeneous mass, smooth, compact surfaces
- All purposes

Elite HD+ Putty *RM300/BOX*

250ml Base + 250ml Catalyst
(Fast Set/Normal Set)

Elite HD+ Putty *RM900/BOX*

2 x 450ml Base + 2 x 450ml Catalyst
(Normal Set)

Zhermack Elite HD+ Putty Soft is a very high viscosity A-Silicone precision impression system. It is an impression material that combines the effects of nanotechnology with hydro compatibility, thus guaranteeing high performance in a variety of clinical conditions.

Elite HD+ Regular Body

RM200/BOX

2 x 50ml Cartridges - Base + Catalyst +
12 mixing tips yellow (Normal Set)

Elite HD + Regular Body Normal is a hydro-compatible silicone impression material of medium viscosity (regular consistency), which is intended for the second layer of two-layer, double and simultaneous impressions. The use of innovative nanotechnology enables very precise mapping of details.

Elite HD+ Light Body

RM200/BOX

2 x 50ml Cartridges - Base + Catalyst +
12 mixing tips yellow (Normal Set)

Elite HD + Light Body is a Hydrophilic Low Viscosity A- Silicone. The hydro compatibility of the washes helps practitioners obtain high-quality impressions. Impression accuracy and reliability, due to its tear resistance and elastic recovery.

Elite HD+ Regular Body Hand Mix

U/P: ~~*RM180*~~ (*Less 15% for clearance*)

RM153/BOX *Expiry date: 2025/04*

2 x 90ml - Base + Catalyst (Normal Set)

BUY 5 FREE 1

Hydrorise Putty *RM325/BOX*

2 x 300ml Tubs - Base + Catalyst (Normal Set)
High performance for Hydrorise, the hyper-hydrocompatible. A-Silicone for high precision impression, which adapts to different impression techniques (double step impression, simultaneous impression with double viscosity and monophase impression) in various clinical situations.

Hydrorise Monophase

RM250/BOX

2 x 50ml Cartridges - Base + Catalyst + 6 mixing tips pink (Normal Set)
Hyper-hydrocompatible medium viscosity A-silicone. Recommended for fixed and removable prostheses, implantology and for monophase technique with one viscosity with special tray.

Hydrorise MAXI Monophase *RM470/Cartridge*

380ml Cartridge (Base + Catalyst + 8pcs dynamic mixer)

- Hydrorise Maxi Monophase Normal Set is a hyper-hydrocompatible medium viscosity A-silicone.
- Packaged for automatic mixing machines (5:1).

Hydrorise Heavy Body

RM250/BOX

2 x 50ml Cartridges - Base + Catalyst + 6 mixing tips pink (Normal Set)
Heavy viscosity A-silicone for fixed prostheses. Recommended for the single-stage technique for filling the tray in combination with Hydrorise wash.

Hydrorise Light Body

RM250/BOX

2 x 50ml Cartridges - Base + Catalyst + 12 mixing tips yellow (Normal Set)
Hyper-hydrocompatible low viscosity A-silicone for fixed prostheses. Recommended for the single-stage or two-stage or impression techniques.

BUY 5 FREE 1

MASTER IMPRESSION

ELITE GLASS

RM380/BOX

DentaPort ZX With OTR function

-You can rely on the integrated safety system; the DentaPort ZX set OTR always knows what to do. The files starts to rotate as soon as it enters the root canal – and stops again as soon as it is removed. And the automatic safety functions are activated as soon as file rotation gets close to the individually set torque limits or the reference point.

Technical Specifications

*specifications may be changed without notice due to improvements

- Model : DP-ZX
- Type : RCM-EX
- Intended Use : The DP-ZX is intended to detect the apex of the root canal.
- Operating Principle : The impedance in the root canal is measured by measuring at two frequencies and the position of the treatment instrument in the root canal is detected.
- Degree of Protection (IEC 60529) : IPX0
- Protection against Electric Shock : Internal powered

ME equipment / Type BF

- Essential performance : None (There is no unacceptable risk).
- Rated input Voltage : DC 4.5 V (three alkaline dry cells [LR6"AA size" batteries])
- Dimensions : Approx. Height 115xWidth 105xLength 105mm
- Weight : Approx. 370g
- Applied Part : File holder , Contrary electrode
- Expected Service Life : 6 years

Configuration:

- 1 Root canal measuring device
- 1 Measuring cable
- 5 Mucosal electrodes
- 3 File clamps
- 1 Test plug
- 3 DC 1,5V-AA batterias

VAFU Cordless LED Curing Light
RM3,500

The Kit includes:

- VAFU Curing Light x 1unit
- Accessory Lenses x 3pcs
- Wireless Charger Base x 1unit
- Stand Bracket x 1unit
- Power Adopter x 1unit
- Rechargeable Lithium Battery x 1pc
- Light Shield x 1unit
- Barrier Sleeves x 100pcs

Available Colours:

- Red
- Blue
- Purple
- Black

Modes Available

Proven Effective method to reduce polymerisation shrinkage

Full power mode: Suitable for most treatment scenarios, such as tooth fillings, restorations, etc

Progressive mode: Effectively reduce the shrinkage rate of the resin, reduce micro-leakage, and ensure dense filling

Pulse mode: Can reduce heat generation and ensure quality and comfort

Note: Doctors can also install their own custom setting parameters based on their personal preference.

High-intensity Light

3 Power modes, 9 ways of irradiation, maximum light intensity up to 3200mw/cm

Time Interval Available: 1, 2, 3, 4, 5, 10, 15, 20, 25, 30, 35, 40 (Seconds). 2mm resin can be cured in 1 second. Especially suitable for orthodontic brackets, porcelain veneers and post – core adhesives.

API (Autoclavable Placement Instrument for Quickmat All-round)

2pcs @ RM599

myWedge

Extra Small, Small, Medium

100pcs @ RM199

myQuickmat All-round is the circumferential matrix system designed to perform anatomical posterior restorations of teeth with missing structures. The easy-to-use Quickmat All-round matrices enable restorations with naturally contoured anatomies and tight contact surfaces. Thanks to API (Autoclavable Placement Instrument), positioning Quickmat All-round matrices is stable and straightforward. API provides support and prevents the tensioning spool from tilting during matrix tightening. With myQuickmat All-round circumferential matrix system, you can comfortably treat challenging cases in the posterior region, working on an obstacle-free, accessible operating field.

myQuickmat Forte StarterKit

Obtain anatomically correct Class II cavity restorations with tight contact points and natural contours using the restorative solutions included in myQuickmat Forte starter kit.

The system allows you to restore teeth with different crown heights as well as teeth with large cavity preparations or missing cusps thanks to the replaceable extremity system myTines.

All components of the kit have been selected to optimise the restorative procedure, allowing quick and predictable results with minimal finishing steps.
